WELCOME TO GRANDSTANDS AUSTRALIA

Grandstands Australia creates solutions for spectator seating requirements providing increased enjoyment for our client's patrons across Australia.

We design and manufacture in Sydney and provide our range of grandstands across Australia. Moreover, we develop custom grandstand solutions backed by our 20-year warranty.

We work closely with our clients in identifying needs to recommend the ideal grandstand solution. Whether it's a standard small grandstand for a primary school or a large multi-tier grandstand for a sports oval we always go the distance to ensure the correct grandstand is manufactured to suit the location and the client's needs.

We are a member of the BAB Aluminium Group that has been manufacturing aluminium seating, tables, and grandstands for over 40 years.

Our range of grandstands includes our GS1 grandstands that are ideal for small, elevated seating needs to our GS4 large grandstands with multi-tier seating and our custom grandstands as specified by Architects and clients.

Grandstands Australia provides a 20 Year Warranty on our Grandstands. Products manufactured by Grandstands Australia are covered by a Structural Certificate (AS:1170.1) Products manufactured by Grandstands Australia are covered by a Cyclone Rating (AS:1170.2-2011).

Our customers in Australia and overseas include Taronga Zoo Sydney, Australian Institute of Sport Canberra, Schools, Councils, Equine & Sports Clubs.

- Delivered as completed
- Delivered as flat pack

ALUMINIUM GRANDSTANDS

Grandstands Australia Aluminium grandstands come with cyclone rated and engineer certified warranties for up to 20 years. Grandstands Australia is a long standing aluminium seating and aluminium grandstands manufacturer to many organisations across Australia and for overseas clients also.

Grandstands Australia supplies aluminium grandstands for council grandstands, school grandstand seating and grandstand seating across Australia for sporting clubs.

Our Aluminium grandstands are used by schools for their outdoor school seating needs, by councils

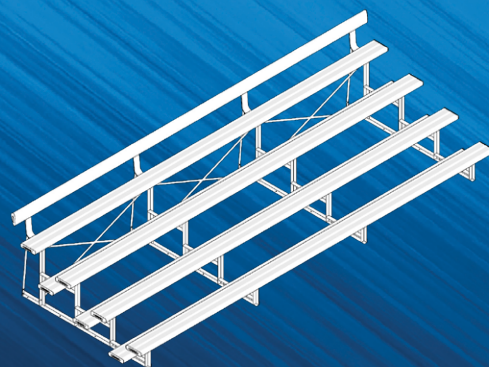

for their grandstand needs in public parks and recreation areas and by many sporting organisations that require aluminium grandstand solutions. Aluminium grandstands come in standard sizes and are manufactured in custom sizes depending on the aluminium grandstand needs.

Grandstands Australia make use of your existing infrastructure to provide extremely cost effective and low maintenance permanent spectator seating for large numbers of people. Grandstands Australia are built to be freestanding or can be fixed. The only requirement is a level even surface.

Strong aluminium construction our grandstands are perfectly safe, lightweight and installed bolt-down.

- Our Grandstands don't erode in the sun like traditional timber
- Guaranteed low cost maintenance
- High traffic seating
- Our grandstands never split or crack
- 20 Year Warranty

DESCRIPTION

A complete proprietary system including heavy duty aluminium support frames and anodised aluminium seat plank with cast aluminium end caps.

ALUMINIUM SEAT SECTION

Extruded aluminium alloy (6060-T5) seat plank 250mm wide with two longitudinal flanged ribs as part of the extrusion. The longitudinal ribs run continuously for the length of the seat and provide fastening for the support frames – Nominal wall thickness – 2.5mm – Finish – Clear anodised 15 microns or Decowood.

SUPPORT FRAMES

Fabricated from 50 x 50 x 6mm angle (6060-T5), 100 x 10mm flat bar (6060-T5) The frames are welded according to (AS-1554) – Finish – as extruded or powder coated.

SEAT END CAPS

Manufactured from cast aluminium to fit seat extrusion – Finish – as cast or powder coated – Manufacturers name cast into end cap.

ASSEMBLY

Fit end caps using two (2) x 4.8mm aluminium pop rivets through the underside longitudinal flanges. Fit support frames using two (2) x 25 x 6mm (minimum) zinc-plated bolts with nylon insert nuts through the underside longitudinal flanges.

INSTALLATION

The stands are freestanding – however for security the stands have 2 x 12mm holes in each base frame which can be used to skew-peg on grass or dyna-bolt to concrete.
